

Interpreting Survey Data

Name _____

Directions- Observe the Survey Paper Strips that were completed last week. Use them to answer the following questions.

Your assigned question number: _____

1) How many pieces of data are there? (Each survey paper strip is a piece of data.)

2) What does your assigned question ask? Paraphrase so that it fits on this line:

3) What answers did people give and how many were there of each? Draw a box around each answer choice, like it shows on the wall.

4) Look at all of the survey strips side-by-side. Choose another question to compare to yours and write its number below. Explain what you think about its answer designs are better or worse than your question. If you had to redesign your question, which design would you use?

Question you are comparing yours to: _____

5) How is this display of data similar to a line or bar graph? How is it different?
