Data Sketches Reflection CER

Take a picture of two of your group's overlaid data sketches and insert it here:

What is one *claim* that you can make based on the data in these two overlaid data sketches? (Write this in 1–2 complete sentences.)

What *evidence* supports this claim? Come up with at least three pieces of specific evidence from the overlaid data sketches. (You can put this in a list but please write in complete sentences.)

1.

2.

3.

What *reasoning* might explain why this claim makes sense? (Write your reasoning in 4–5 complete sentences. Include at least one *scientific principle* that you think helps support your thinking.)

Using a dry erase board, make a *mental model* (a sketch that illustrates your thinking behind the reasoning you wrote above). Photograph your mental model and insert it here:
